TABLE OF CONTENTS

Important Notification

Supported OS

Because Windows 7 OS has past the end of support date, Grass Valley may no longer be able to provide any fix or improvement for issue/request confirmed in Windows 7 environment.

If Windows Defender SmartScreen prevents the installer from starting

If Windows Defender SmartScreen prevents the installer from starting, please follow the following steps.

1) Right-click the installer file then select "Properties"

2) Open "Digital Signatures" tab then make sure the file has the digital signature of "GRASS VALLEY K.K."

3) Open "General" tab then check [Unlock] checkbox

4) Click [Apply] button, then click [OK] button

5) Run the installer again

New Features & fixed issues

New Features

The following new features have been provided since EDIUS 9.55.9157:

EDIUS

- To prevent accidental cancellation of an export, a confirmation dialog will now appear when the cancel button on the progress bar is pressed
- Supports displaying CEA-708 closed caption contains double-byte characters

Mync

 * *No new feature*

Fixed or improved issues

The following issues have been fixed or improved since EDIUS 9.55.9157:

EDIUS

- There is a possibility that EDIUS freezes when exporting if autosave takes a long time (SFDC00820653)
- When an effect settings dialog is maximized, some of key frames set in the dialog are not applied to rendered clips nor exported files (SFDC00824170)
- If a clip is transferred from removable media to project folder, file path of transferred clip is not changed (SFDC00824714)
- [OK] button on some filter settings dialogs is unable to be clicked if a vertical frame like 2160x3840 is set in the project settings
- A picture blinks if Mask filter is applied (SFDC00840058)
- Export with the XRE or GVRE fails if the export is started before completion of analysis of Stabilizer filter
- EDIUS crashes when a certain MP4 file is loaded (SFDC00849459)
- There is an operation that breaks the default exporter list when the current profile has been changed to read-only (SFDC00853186)
- EDIUS occasionally freezes when a growing clip is shown in the Player (SFDC00863170)
- EDIUS occasionally freezes if the combination of Tunnel Vision filter and Transform filter are applied
- EDIUS incorrectly handles the timecode of proxies shot by Sony cameras (SFDC00848752, 0084907)
- Footage corrupts in exported XAVC Long GOP files (SFDC00853652)
- Black frames appear randomly while playing the timeline with HEVC clips
- If a certain JPEG file is loaded, the image becomes black (SFDC00858876)
- File transcode with XRE or GVRE gives incorrect results if the target file is imported with one of certain types of third-party importers (SFDC00870083)
- K2 FTP source browser sends '\' (backslash) instead of '/' (slash) to the FTP servers (SFDC00867493)
- Occasionally render or export fails when the Mask filter is used (SFDC00872701)
- EDIUS misidentifies scan type for certain MP4 files (SFDC00879112)
- "Render and add to timeline" fails depending on the render format (SFDC00836174)
- Audio tracks in an MP4 file will be ignored if their start positions differ from the first audio track (SFDC00881472, 00882488, 00883536, 00888105)
- XRE Transcoder misidentifies color space of Final Cut Pro XML files
- If an I/O error occurs during reading a source file on export, there is possibility that a black part is inserted at the end of the exported file (SFDC00821867)
- Rarely an exported file has a frame whose lower field is black if progressive to interlaced conversion in done on export (SFDC00820151, 00824596, 00858871)
- When insert editing is done with an XDCAM deck as the recorder, black noise occasionally appears after the out point
- In certain environments, EDIUS fails to start with the error "The application is not installed correctly" and reinstalling EDIUS does not improve the situation (SFDC00898838)

GV Grass Valley

- Saving a project fails after leaving EDIUS idle for a while if the project is in a remote folder (SFDC00867300)
- Occasionally HLS clips on the timeline cannot be extended beyond certain points (SFDC00892195)
- Under certain conditions, the MXF exporter occasionally fails to export

Mync

- Black frames appear randomly while playing a storyboard with HEVC clips
- If a certain JPEG file is loaded, the image becomes black (SFDC00858876)
- Mync misidentifies scan type for certain MP4 files (SFDC00879112)
- If an I/O error occurs during reading a source file on export, there is possibility that a black part is inserted at the end of the exported file (SFDC00821867)
- Rarely an exported file has a frame whose lower field is black if progressive to interlaced conversion in done on export (SFDC00820151, 00824596, 00858871)

Design Limitations

Restrictions after uninstallation of QuickTime for Windows

In both EDIUS 9 and Mync, the following functionality will be lost if QuickTime is uninstalled:

- Still Image File Formats: Flash Pix; Mac Pict; QuickTime Image
- Video File Formats (Import / Export): M4V or some MOV file formats
  MOV files whose video formats are general ones such as MPEG-2, H.264/AVC, ProRes, etc. are able to be imported / exported
- Video File Formats (Export): 3GP (MOV); 3G2 (MOV)
- Audio File Formats: MOV (other than Linear PCM and AAC); QuickTime Audio
